

**SPECIFICATION AMENDMENT**

1. Please replace the paragraph 0005 with the following amended paragraph:

[0005] The object of the present invention is therefore to propose a piezoactuator which can simply and cost-effectively be contacted electrically and a method for its production. This object can be achieved a piezoactuator comprising a piezoceramic which can expand when a voltage is applied and contacting elements which rest against the piezoceramic, wherein the contacting elements are formed as profiled sheets which have contact surfaces spaced at intervals from one another.
